Aluminium door range

Made to measure  
Express service

## **FORTIS1 Aluminium flush bonded door system:**

The Fortis1 range of doors is a composition of quality components, simple designs and functional hardware. We have designed the Fortis1 to retain the excellent standards and quality found in our D72 range whilst being excellently priced. Due to the design limitations we can produce the Fortis1 doors in just 4 weeks.

### **Components:**

Fortis1 uses the same 3mm aluminium plates both internally and externally as the D72 range of doors as well as the same high quality 7 point lock system. Our profiles have the unique sprung thermal break that minimises warping and offers fantastic thermal insulation levels. All of this plus 66mm of dense PU insulation makes the Fortis1 one of the best value, quality aluminium door systems on sale in the UK today. The specification outweighs the price point.

### **Manufacturing:**

By restricting the range to 6 designs and **one** standardised suite of hardware, we are able to keep the quality high and the cost low. Our Fortis1 doors are manufactured on the same production line as our other products, right here in the UK. Made to measure by hand.

### **Options:**

The Fortis1 range is available in 2 colour finishes, RAL 7016 Anthracite grey & RAL 9005 Jet Black both in our luxurious fine structure finish. The same colour is applied to both sides of the door. The door is furnished with a silver anodised internal handle and hinges and 1000mm stainless steel pull handle externally. Glazed doors have an option of either Satin or Clear glass.

### **Glass:**

Fortis1 door glass is triple glazed argon filled and laminated for security. Fitted with warm edge spacer bar and bonded into the door construction.

### **Security:**

7 point locking and fully adjustable hinges. High security 3\* lock cylinder with thumb turn.

### **Sidelights:**

The Fortis1 door comes with triple glazed laminated sidelights, made to measure with widths up to 800mm wide. All doors are supplied in a 1-piece frame.
